PURPOSE

This Marine Notice establishes the requirements for electronic documents and certificates issued by the Republic of the Marshall Islands (RMI) Maritime Administrator (the “Administrator”). It includes the conditions for their features, conveyance, and verification, and identifies documents and certificates previously issued by the Administrator that may be maintained in printed form. This document, which supersedes version Nov/2017, lists in the section on Applicability additional certificates and documents required to be carried on board ships that are issued in electronic form.

BACKGROUND

The International Maritime Organization (IMO) guidelines, as contained in IMO Circular FAL.5/Circ.39/Rev.2, set out the features for electronic certificates to enable stakeholders to verify their authenticity. The guidelines are intended to alleviate the problems inherent in paper documentation and facilitate the maritime sector’s move toward the use and acceptance of electronic certificates. The Administrator’s requirements for electronic documents and certificates contained in this Marine Notice are based upon the IMO guidelines.

Importantly, this updated Marine Notice supports the Administrator’s continued process of moving toward full implementation of issuing electronic documents and certificates in accordance with IMO Circular FAL.5/Circ.39/Rev.2. This Notice will be updated as additional documents and certificates can be issued electronically in accordance with IMO Circular FAL.5/Circ.39/Rev.2.
Of note, the Administrator is currently working with its Recognized Organizations (ROs) on the issuance of electronic statutory and class certificates, and survey reports. As provided in Marine Notice 2-011-4, the Administrator has authorized their issuance electronically, “subject to prior review and acceptance in writing of the form of the certificates and the procedures an RO has in place.” Electronic certificates issued by the RO must conform to IMO Circular FAL.5/Circ.39/Rev.2.
