### **MARINE SAFETY ADVISORY No. 09-25**

**To: Owners/Operators, Masters, Nautical Inspectors, Recognized Organizations**

**Subject: SURVEY ON GLOBAL NAVIGATION SATELLITE SYSTEM  
INTERFERENCE**

**Date: 12 September 2025**

The Republic of the Marshall Islands (RMI) Maritime Administrator (the “Administrator”) would like to draw attention to a [voluntary and anonymous survey](#) launched by the Royal Institute of Navigation (RIN) on maritime Global Navigation Satellite System (GNSS) interference.

GNSS interference refers to both GNSS jamming (the blocking of GNSS signals) and GNSS spoofing (the broadcasting of fake GNSS signals to make a GNSS receiver calculate an incorrect position and/or time).

The purpose of gathering and processing this data is to produce statistics, graphs, and other processed information for the RIN Maritime GNSS Interference Report. This report may be used to create future shipping industry guidance. Please refer to the link above for additional information.

This MSA expires one (1) year after its issuance, unless otherwise noted, extended, superseded, or revoked.
