

THE MARSHALL ISLANDS REGISTRY

Renewable Energy and Associated Technologies

SERVING THE GLOBAL RENEWABLE ENERGY INDUSTRY AND ASSOCIATED TECHNOLOGIES

International Registries, Inc. and its affiliates (IRI) provide administrative and technical support to the Republic of the Marshall Islands (RMI) Maritime and Corporate Registries. The RMI has the youngest and greenest fleet in the world and is the only registry globally to be recognized by the United States Coast Guard's QUALSHIP 21 roster for 17 consecutive years. Whitelisted with both the Paris and Tokyo Memorandums of Understanding, and as the largest registry with a perfect rating in the [International Chamber of Shipping's annual Shipping Industry Flag State Performance Table 2020/2021](#), the RMI Registry is committed to supporting the developing renewable energy industry while implementing new technologies to create a sustainable future.

EXPERIENCE

The RMI Registry's vast technical experience in traditional offshore units has transferred into a specific proficiency in wind vessels such as wind turbine installation vessels (WTIVs), crew transfer vessels (CTVs), service operation vessels (SOVs), and floating offshore wind turbines (FOWTs). The RMI is the world's second largest registry, in terms of gross tonnage, for traditional offshore units including drilling, production, accommodation, and support vessels, and self-elevating, semi-submersible, tension leg, and ship-shaped units. Through its reputation and experience in the offshore sector, the RMI Registry is becoming the choice of flag for new WTIVs and FOWTs, and has recently flagged wind farm construction vessels, walk to work vessels, and wind farm support and survey vessels which are supporting projects in the United Kingdom, Singapore, South Africa, Malaysia, and Taiwan. The RMI Registry's Global Renewable Energy Team (hereinafter, "Renewables Team"), through its support of these projects, is positioned to continue its contribution to this growing sector.

ADVANTAGES

There are significant advantages to working with the RMI Registry from the earliest stages of a project.

Through its network of 27 worldwide offices, the RMI Registry provides customers with technical support and decision-making capabilities in their local time zones. The Registry's Renewables Team includes technical experts located throughout the world, allowing the RMI fleet access to relevant expertise in this area of innovative and advanced technology without geographical or time-zone limitations. The RMI Registry collaborates with owners and operators, Classification Societies/ Recognized Organizations (ROs), and stakeholders to aid in delivery of a project, and then continues to support the project through no charge technical support while the vessel is registered under the flag.

Where financing decisions need to be made, matters like flag reputation and Environment, Social and Governance (ESG) principles are essential. Recognized by port State control authorities worldwide as a leader in safe vessel operations, owners know they are in experienced hands when they flag with the RMI.

REGULATION

The RMI is at the forefront of the development and application of regulations for offshore wind vessels. Together with its ROs, the RMI Maritime Administrator has put in place statutory certification schemes for WTIVs and FOWTs that account for their unique blend of features. Examples include WTIVs, which typically carry wind turbine and tower components to and from ports, have more than 12 people in addition to crew, and have mobile offshore drilling unit-like elements such as the jacking system and the helideck, and FOWTS which have specialized hull designs and equipment and no onboard crew.

Using experience in the offshore industry as a basis and considering the complexity of the operational profile of wind vessels, the certification schemes were developed with maximum vessel-owner flexibility and project risk management in mind.

For expert assistance with new projects in this sector,
please contact technical@register-iri.com.

SERVICES INCLUDE:

- Vessel/ Yacht Registration
- Mortgage and Lease Financing
Recordation and Documentation
- Vessel Inspection
- Radio Station Licensing
- Officer and Crew
Examination / Certification
- Seafarers' Identification
and Record Books
- Technical Assistance
- Investigations
- Information on Maritime Regulations
and Port Activities
